India is marching ahead with confidence to its glorious future. Hon'ble Governor explained how the paradigm of developing India as fundamentally changed with Hon'ble Prime Minister Modi's all inclusive development. Earlier model of development had created huge regional and sub-regional imbalances and social tensions. He stated that how in a progressive state like Tamil Nadu there are development, differentials and sub-regional imbalances.

He called the earlier model of development Darwinian as some relatively smarter people cornered the benefits leaving the rest behind. As a result even after our some six and half decades of Independence India was home to largest number of poor, sick and illiterate. Prime Minister Modi's all inclusive development model is ensuring food, shelter, health, education, electricity, cooking gas etc which are basic ingredients of a healthy

citizenship to reach every citizen of India in all parts of the country without discrimination. Hon'ble Governor urged the young graduates to go for entrepreneurship and innovation, seize the opportunities and build India the world leader in the next 25 years.
